QUESTIONS

20 / 20 completed

Draw

DRAW

Write a Java program to demonstrate polymorphism with interfaces. Create an interface called Drawable with a method called draw(). Then, create classes such as Circle and Square that implement the Drawable interface and have their own unique implementations of the draw() method.

PROGRAM EDITOR

Java

Run

Save

```
1 class Main {
2     public static void main(String[] args) {
3         // Using the interface type to refer to different object types
4         Drawable shape1 = new Circle();
5         Drawable shape2 = new Square();
6
7         // Demonstrating polymorphic behavior
8         shape1.draw();
9         shape2.draw();
10    }
11 }
12
13 // Define the Drawable interface
14 interface Drawable {
15     void draw();
16 }
17
18 // Implement the Circle class
19 class Circle implements Drawable {
20     @Override
21     public void draw() {
```

OUTPUT

Compilation Error:

C:\Windows\TEMP\sandbox_192311149RA_6a7e181bc59259.50160456\to.

java:2: error: class Main is public, should be declared in a
file named Main.java

```
public class Main {
```
