QUESTIONS

20 / 20 completed

Employee

EMPLOYEE

Write a Java program to implement a basic employee management system using inheritance. Create a parent class called Employee with attributes such as name, id, and salary. Then, create child classes such as Manager and SalesPerson that inherit from the Employee class and have their own unique methods for managing teams and making sales.

PROGRAM EDITOR

Java

Run

Save

```
1 import java.util.*;
2
3 class Main{
4     public static void main(String[] args){
5         Scanner sc = new Scanner(System.in);
6         while(sc.hasNextLine()){
7             String type = sc.nextLine();
8             if(type.isEmpty()){
9                 break;
10            }
11            String name = sc.nextLine();
12            int id = sc.nextInt();
13            double salary = sc.nextDouble();
14            if(type.equalsIgnoreCase("Manager")){
15                Manager m = new Manager();
16                m.name = name;
17                m.id = id;
18                m.salary = salary;
19                m.display();
20            }else if(type.equalsIgnoreCase("SalesPerson")){
21                SalesPerson s = new SalesPerson();
```

OUTPUT

```
--- Employee : SalesPerson ---
Name : Bhavya
ID : 102
Salary : 30000.0
```

INPUT

SalesPerson

Bhavya

102

30000
