QUESTIONS

20 / 20 completed

Library

LIBRARY

Write a Java program to implement a basic library management system using inheritance. Create a parent class called Item with attributes such as title and author. Then, create child classes such as Book and DVD that inherit from the Item class and have their own unique attributes and methods for borrowing and returning items.

PROGRAM EDITOR

Java

Run

Save

```
1 import java.util.*;
2
3 public class Main {
4     public static void main(String[] args) {
5         // Creating a Book object
6         Book myBook = new Book("Java Programming", "Herbert Schildt");
7
8         // Creating a DVD object
9         DVD myDVD = new DVD("Inception", "Christopher Nolan", 148);
10
11        // Testing Book
12        myBook.displayBookDetails();
13        myBook.borrowItem();
14        myBook.borrowItem(); // Try borrowing again
15        myBook.returnItem();
16
17        System.out.println("-----");
18
19        // Testing DVD
20        myDVD.displayDVDDetails();
21
```

OUTPUT

Error: Could not find or load main class placed
Caused by: java.lang.ClassNotFoundException: placed
