Rental

RENTAL

Write a Java program to implement a basic car rental system using inheritance. Create a parent class called Vehicle with attributes such as make and model. Then, create child classes such as Sedan and SUV that inherit from the Vehicle class and have their own unique attributes and methods for renting and returning cars.

PROGRAM EDITOR

Java

Run

Save

```
1 import java.util.Scanner;
2
3 public class Rental {
4     public static void main(String[] args) {
5         Scanner sc = new Scanner(System.in);
6
7         System.out.println("=== Car Rental System ===");
8
9         System.out.print("Enter type (1 for Sedan, 2 for SUV): ");
10        int choice = sc.nextInt();
11        sc.nextLine();
12
13        Vehicle vehicle;
14
15        if (choice == 1) {
16            System.out.print("Enter Sedan make: ");
17            String make = sc.nextLine();
18            System.out.print("Enter Sedan model: ");
19            String model = sc.nextLine();
20            System.out.print("Enter number of seats: ");
21
```

OUTPUT

```
=== Car Rental System ===
Enter type (1 for Sedan, 2 for SUV): Enter SUV make: Enter
SUV model: Is it 4WD? (true/false):
--- Vehicle Details ---
Vehicle: Jeep Wrangler
Type: SUV | 4WD: Yes

--- Renting Car ---
SUV rented (4WD: Yes): Jeep Wrangler
```

INPUT

2

Jeep

Wrangler

true
