QUESTIONS

20 / 20 completed

Resturant

RESTURANT

Write a Java program to implement a basic restaurant management system using inheritance. Create a parent class called Menu with attributes such as name and price. Then, create child classes such as Appetizer and Entree that inherit from the Menu class and have their own unique attributes and methods for ordering and serving food.

PROGRAM EDITOR

Java

Run

Save

```
1 public class Main {
2
3     public static void main(String[] args) {
4         Appetizer a1 = new Appetizer("Garlic Bread", 5.99, "Mild");
5         Entree e1 = new Entree("Grilled Chicken", 12.50, 650);
6
7         System.out.println("---- MENU ----");
8         a1.display();
9         e1.display();
10
11        System.out.println("\n---- ORDER & SERVE ----");
12        a1.order();
13        a1.serve();
14
15        System.out.println();
16
17        e1.order();
18        e1.serve();
19    }
20 }
21
```
