Student-Const

STUDENT-CONST

Write a Java program to create a class called Student with a constructor that takes in a name, ID number, and a list of grades, and methods to calculate and return the student's average grade and letter grade.

PROGRAM EDITOR

Java

Run

Save

```
1 import java.util.List;
2 import java.util.ArrayList;
3
4 class Student {
5     private String name;
6     private String idNumber;
7     private List<Double> grades;
8
9     // Constructor
10    public Student(String name, String idNumber, List<Double> grades) {
11        this.name = name;
12        this.idNumber = idNumber;
13        this.grades = grades;
14    }
15
16    // Method to calculate average grade
17    public double calculateAverage() {
18        if (grades == null || grades.isEmpty()) {
19            return 0.0;
20        }
21        double sum = 0;
```
