QUESTIONS

31 / 31 completed

B to D

B TO D

Write a Java program to convert a binary number to decimal using loops and conditional statements.

PROGRAM EDITOR

Java

Run

Save

```
1 import java.util.Scanner;
2
3 class Main{
4     public static void main(String[] args){
5         Scanner sc = new Scanner(System.in);
6         long binary = sc.nextLong();
7
8         long original = binary;
9         int decimal = 0;
10        int base = 1;
11        boolean isValid = true;
12
13        while(binary > 0){
14            int lastDigit = (int) (binary % 10);
15
16            if(lastDigit != 0 && lastDigit != 1){
17                isValid = false;
18                break;
19            }
20            decimal = decimal + (lastDigit * base);
21            base = base * 2;
```

OUTPUT

Decimal : 10

INPUT

1010
