SEARCH

Write a Java program to implement binary search on an array of integers using loops and conditional statements.

PROGRAM EDITOR

Java

Run

Save

```
1 import java.util.Scanner;
2
3 class Main{
4
5     public static int binarySearch(int[] arr,int t){
6         int n = arr.length;
7         int l=0,h=n-1;
8         while(l<=h){
9             int m = l + (h-l)/2;
10            if(arr[m] == t){
11                return m;
12            }else if(arr[m] < t){
13                l = m + 1;
14            }else{
15                h = m - 1;
16            }
17        }
18        return -1;
19    }
20
21    public static void main(String[] args){
```
