QUESTIONS

8 / 8 completed

Counter-T

COUNTER-T

Write a Java program to create a thread-safe counter that can be accessed by multiple threads simultaneously.

PROGRAM EDITOR

Java

Run

Save

```
1 import java.util.ArrayList;
2 import java.util.List;
3
4 public class Main {
5     public static void main(String[] args) throws InterruptedException {
6         Counter counter = new Counter();
7         List<Thread> threads = new ArrayList<>();
8
9         // Create 5 threads, each incrementing the counter 1000
10        for (int i = 0; i < 5; i++) {
11            Thread t = new CounterThread(counter);
12            threads.add(t);
13            t.start();
14        }
15
16        // Wait for all threads to finish
17        for (Thread t : threads) {
18            t.join();
19        }
20
21        System.out.println("Final Counter Value: " + counter.get());
22    }
23 }
```
