QUESTIONS

8 / 8 completed

M-Thread

M-THREAD

Write a Java program to create multiple threads that perform some time-consuming task, such as calculating prime numbers or sorting an array, and compare their execution times.

PROGRAM EDITOR

Java

Run

Save

```
1 import java.util.ArrayList;
2 import java.util.List;
3
4 public class MultiThreadPrimeCalculator {
5
6     // Method to check if a number is prime
7     static boolean isPrime(int number) {
8         if (number < 2) return false;
9         for (int i = 2; i <= Math.sqrt(number); i++) {
10             if (number % i == 0) return false;
11         }
12         return true;
13     }
14
15     // Thread class to calculate primes in a given range
16     static class PrimeCalculatorThread extends Thread {
17         private int start, end;
18         private List<Integer> primes = new ArrayList<>();
19
20         public PrimeCalculatorThread(int start, int end) {
21
```
