QUESTIONS

8 / 8 completed

Deadlock

DEADLOCK

Write a Java program to create a deadlock scenario using multiple threads.

PROGRAM EDITOR

Java

Run

Save

```
1 public class DeadlockDemo {
2
3     private static final Object lockA = new Object();
4     private static final Object lockB = new Object();
5
6     static class Worker1 extends Thread {
7         @Override
8         public void run() {
9             synchronized (lockA) {
10                 System.out.println("Thread 1: Locked lockA");
11                 try { Thread.sleep(100); } catch (InterruptedException e) {}
12
13                 System.out.println("Thread 1: Waiting for lockB")
14                 synchronized (lockB) {
15                     System.out.println("Thread 1: Locked lockB")
16                 }
17             }
18         }
19     }
20
21     static class Worker2 extends Thread {
```

OUTPUT

Error: Execution timeout (>5 seconds) – possible infinite loop
