QUESTIONS

8 / 8 completed

Wait-Notify

WAIT-NOTIFY

Write a Java program to demonstrate how to use the "wait" and "notify" methods to implement a producer-consumer scenario.

PROGRAM EDITOR

Java

Run

Save

```
1 public class Main {
2     public static void main(String[] args) {
3         // Buffer size of 5
4         BoundedBuffer buffer = new BoundedBuffer(5);
5
6         Thread producerThread = new Thread(new Producer(buffer))
7         Thread consumerThread = new Thread(new Consumer(buffer))
8
9         producerThread.start();
10        consumerThread.start();
11    }
12 }
13
14 class BoundedBuffer {
15     private final int[] buffer;
16     private int count = 0;
17     private int index = 0;
18
19     public BoundedBuffer(int size) {
20         buffer = new int[size];
21     }
```
