QUESTIONS

8 / 8 completed

Join

JOIN

Write a Java program to demonstrate how to use the "join" method to wait for a thread to complete its execution before proceeding with the main thread.

PROGRAM EDITOR

Java

Run

Save

```
1 public class JoinDemo {
2     public static void main(String[] args) {
3         System.out.println("Main thread started.");
4
5         MyThread t1 = new MyThread("Child-1");
6         t1.start();
7
8         System.out.println("Main thread waiting for child thread");
9         try {
10             // join makes main thread wait until t1 finishes
11             t1.join();
12         } catch (InterruptedException e) {
13             System.out.println("Main thread interrupted.");
14         }
15
16         System.out.println("Main thread resumed after child thread");
17         System.out.println("Main thread finished.");
18     }
19 }
20
21 class MyThread extends Thread {
```
