

Initial State: sum is initialized to 0.

Loop Execution (i from 1 to 5):

When $i = 1$ (odd): sum becomes $0 - 1 = -1$

When $i = 2$ (even): sum becomes $-1 + 2 = 1$

When $i = 3$ (odd): sum becomes $1 - 3 = -2$

When $i = 4$ (even): sum becomes $-2 + 4 = 2$

When $i = 5$ (odd): sum becomes $2 - 5 = -3$

Output: The program prints sum, which is -3.
