QUESTIONS

8 / 8 completed

Character

CHARACTER

You are developing a game that involves different types of characters, such as heroes, villains, and monsters. Write a Java program to create an interface called "Character" with methods for moving, attacking, and taking damage. Implement the interface in classes for each type of character, such as "Hero", "Villain", and "Monster".

PROGRAM EDITOR

Java

Run

Save

```
1 public class Main {
2     public static void main(String[] args) {
3         Character hero = new Hero("Hero Ram", 100);
4         Character villain = new Villain("Villain Dark", 120);
5         Character monster = new Monster("Monster Zord", 80);
6
7         hero.move();
8         hero.attack();
9         hero.takeDamage(30);
10
11        System.out.println(); // Adding a line break for clarity
12
13        villain.move();
14        villain.attack();
15        villain.takeDamage(50);
16
17        System.out.println(); // Adding a line break for clarity
18
19        monster.move();
20        monster.attack();
21
```
