QUESTIONS

20 / 20 completed

Lower

LOWER

Write a Java program to convert a given string to lowercase.

PROGRAM EDITOR

Java

Run

Save

```
1 import java.util.Scanner;
2
3 public class Main {
4     public static void main(String[] args) {
5         Scanner scanner = new Scanner(System.in);
6
7         // Prompting for input
8         if (scanner.hasNextLine()) {
9             String input = scanner.nextLine();
10
11             // Converting the string to lowercase
12             String lowerCaseString = input.toLowerCase();
13
14             // Printing the result
15             System.out.println(lowerCaseString);
16         }
17
18         scanner.close();
19     }
20 }
```
