QUESTIONS

20 / 20 completed

Substring

SUBSTRING

Write a Java program to create a substring from a given string.

PROGRAM EDITOR

Java

Run

Save

```
1 import java.util.Scanner;
2
3 public class Main {
4     public static void main(String[] args) {
5         Scanner sc = new Scanner(System.in);
6
7         System.out.println("Enter the string:");
8         String str = sc.nextLine();
9
10        // Taking input for the starting index
11        System.out.println("Enter the starting index:");
12        int start = sc.nextInt();
13
14        // Taking input for the ending index
15        System.out.println("Enter the ending index:");
16        int end = sc.nextInt();
17
18        // Extracting the substring
19        // Note: substring(start, end) includes start index but excludes end index
20        try {
21            String sub = str.substring(start, end);
```

OUTPUT

```
Enter the string:
Enter the starting index:
Enter the ending index:
The substring is: Hello
```

INPUT

HelloWorld

0

5
